## INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP 2004/016059

**Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

**Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows:

The "special technical features" of Group I relates to an absorbance of the yellow inks and an oxidation potential of the yellow dyes, the "special technical features" of Group II relates to an absorbance of the black inks and an oxidation potential of the dyes, the "special technical features" of Group III relates to an absorbance of the magenta inks and an oxidation potential of the dyes, while the "special technical features" of Group IV relates to an ink set consisting of the above inks.

There is no technical relationship among those inventions involving one or more of the same or corresponding technical features. Therefore, these groups of inventions are not so linked as to form a single general inventive concept.

Group I: Claims 1-3 Group II: Claims 4-9 Group III: Claims 10-13, 15-19 Group IV: Claims 14
